John Sandwith, Sandwith Farm Services

Following complete usage of Sexed Semen, Sandwith Farms are selling a group of 20 crossbred dairy heifers, comprising 5 recently served heifers, 11 bulling heifers and 4 heifer calves. These are a selection of Norwegian Red, Red & White Holstein and Ayrshire cross Heifers, bred from a conventional cross bred dairy herd, with a herd average of 7,500l, 4.2% Butterfat and 3.5% Protein on a solely silage based diet. All sires are Genomic Genus bulls, and those served have been served with sexed semen, Genus "Rainstorm". The herd is currently within a 3km radial TB testing area but has never had any reactors or inconclusive test results. The last clear test being 6th October 2020. A group of heifers worthy of buyers' attention, which will suit both modern and traditional farms.
